

# NUTSHELLS GRANULES

Nutshell granules are an extremely soft, organic blasting media from crushed, cleaned and sifted walnut shells.

## APPLICATIONS

- Reusable abrasive
- Cleaning without base material losing substance
- Deburring
- Paint-stripping

## BLASTING SYSTEMS

- Pressure blast systems
- Injection blast cabinets

### Typical physical properties

Hardness	ca. 3,5 - 4,0 mohs
Grain shape	kantig
Ignition temperature	< 500°C
Specific gravity	ca. 1,5 g/cm <sup>3</sup>
Bulk density (depending on granular size)	ca. 0,8 - 0,9 g/cm <sup>3</sup>

### Typical chemical analysis

non-ferrous

### Packaging

20 / 25 kg bags on a pallet

### Available sizes

Metric	Average grain size (µm)
	100 - 250
	200 - 450
	450 - 800
	450 - 1000
	800 - 1300
	1000 - 1500
	1000 - 1700
	1300 - 1700
	1700 - 2400
	2400 - 4000
	4000 - 6000
	4000 - 8000
	6000 - 10000

Other grain sizes can be produced if required.
